TASK1

1. Open Command Prompt and navigate to the root of the C drive.

```
Microsoft Windows [Version 10.0.22000.2538]
(c) Microsoft Corporation. All rights reserved.

C:\Users\Bima>cd C:\

C:\>cd DevWorkspace
The system cannot find the path specified.
```

2. Create a folder named DevWorkspace and move into it.

```
C:\>cd DevWorkspace
The system cannot find the path specified.

C:\>cd DevWorkspace
The system cannot find the path specified.

C:\>mkdir DevWorkspace

C:\>cd DevWorkspace
```

3. Inside DevWorkspace, create an empty file named test.txt and another file named hello.txt containing the text "Hello World".

```
:\>cd DevWorkspace

:\DevWorkspace>type nul > test.txt

:\DevWorkspace>echo Hello World > hello.txt

:\DevWorkspace>mkdir Projects
```

4. Create two subfolders: Projects and Backup.

```
C:\DevWorkspace>echo Hello World > hello.txt

C:\DevWorkspace>mkdir Projects

C:\DevWorkspace>mkdir Backup
```

5. Rename hello.txt to greeting.txt.

```
C:\DevWorkspace>mkdir Backup

C:\DevWorkspace>ren hello.txt greeting.txt

C:\DevWorkspace>copy greeting.txt copy.txt
        1 file(s) copied.
```

6. Make a copy of greeting.txt named copy.txt and move that copy into the Backup folder.

```
C:\DevWorkspace>ren hello.txt greeting.txt

C:\DevWorkspace>copy greeting.txt copy.txt
        1 file(s) copied.

C:\DevWorkspace>move copy.txt Backup\
        1 file(s) moved.

C:\DevWorkspace>del test.txt
```

7. Delete the original test.txt file.

```
C:\DevWorkspace>del test.txt

C:\DevWorkspace>rmdir Projects
```

8. Remove the empty Projects folder.

```
C:\DevWorkspace>del test.txt

C:\DevWorkspace>rmdir Projects

C:\DevWorkspace>mkdir OldFiles
```

9. Create a new folder named OldFiles and a folder named TempFolder inside DevWorkspace.

```
C:\DevWorkspace>rmdir Projects

C:\DevWorkspace>mkdir OldFiles
```

10. Delete the OldFiles folder along with everything inside it (it should be empty for this exercise).

```
C:\DevWorkspace>mkdir OldFiles

C:\DevWorkspace>mkdir TempFolder
```

11. Delete the TempFolder folder and all its contents without any confirmation prompt.

```
C:\DevWorkspace>mkdir TempFolder

C:\DevWorkspace>rmdir OldFiles
```

12. Navigate back to the C drive root.

```
C:\DevWorkspace>rmdir OldFiles

C:\DevWorkspace>rmdir /S /Q TempFolder

C:\DevWorkspace>cd C:\

C:\>rmdir /S /Q DevWorkspace
```

13. Finally, delete the entire DevWorkspace folder completely, including all remaining files and subfolders, without being prompted for confirmation.

```
C:\DevWorkspace>rmdir /S /Q TempFolder

C:\DevWorkspace>cd C:\

C:\>rmdir /S /Q DevWorkspace

C:\>rmdir /S /Q DevWorkspace
The system cannot find the file specified.

C:\>dir C:\
 Volume in drive C has no label.
 Volume Serial Number is 5EF1-A76F

 Directory of C:\

```

TASK2

1. Open Command Prompt and navigate to the C drive root.

```
Microsoft Windows [Version 10.0.22000.2538]
(c) Microsoft Corporation. All rights reserved.

C:\Users\Bima>cd \

C:\>mkdir Reports
```

2. Create a folder named Reports and move into it

```
C:\>mkdir Reports

C:\>cd Reports
```

3. Inside Reports, create a file named summary.txt containing the text "Daily Summary Report".

```
C:\>cd Reports

C:\Reports>echo Daily Summary Report > summary.txt

C:\Reports>mkdir Archive
```

4. Create a subfolder named Archive and another named Backups.

```
C:\Reports>mkdir Archive

C:\Reports>mkdir Backups
```

5. Copy summary.txt into both the Archive and Backups folders.

6. Rename the copy inside Archive to summary_old.txt.

```
C:\Reports>copy summary.txt Archive
        1 file(s) copied.
```

7. Create an empty file named data.csv in the main Reports folder.

```
C:\Reports>copy summary.txt Backups
        1 file(s) copied.
```

8. Move data.csv into the Backups folder.

```
:\Reports>ren Archive\summary.txt summary_old.txt

:\Reports>type nul > data.csv
```

9. Delete the original summary.txt from the main Reports folder.

```
C:\Reports>type nul > data.csv

C:\Reports>del summary.txt
```

10. Navigate back to the C drive root.

```
C:\Reports>del summary.txt

C:\Reports>cd \
```

11. Delete the Archive folder and everything inside it.

```
C:\>rmdir /s Archive
Archive, Are you sure (Y/N)? Y
```

12. Delete the entire Reports folder silently without confirmation.

```
C:\>rmdir /s /q Reports

C:\>dir C:\

```

TASK3

1. Navigate to the C drive root from Command Prompt.

```
Microsoft Windows [Version 10.0.22000.2538]
(c) Microsoft Corporation. All rights reserved.

C:\Users\Bima>cd \

C:\>mkdir MyWebsite
```

2. Create a folder named MyWebsite and enter it.

```
C:\>mkdir MyWebsite
A subdirectory or file MyWebsite already exists.

C:\>cd MyWebsite
```

```
C:\>cd MyWebsite

C:\MyWebsite>cd MyWebsite
The system cannot find the path specified.
```

3. Inside MyWebsite, create three subfolders: css, js, and images.

```
C:\MyWebsite>cd MyWebsite
The system cannot find the path specified.

C:\MyWebsite>mkdir css js images
A subdirectory or file css already exists.
Error occurred while processing: css.
A subdirectory or file js already exists.
Error occurred while processing: js.
A subdirectory or file images already exists.
Error occurred while processing: images.

C:\MyWebsite>cd css
```

4. Navigate into the css folder and create an empty file named style.css.

```
C:\MyWebsite>cd css

C:\MyWebsite\css>type nul > style.css
```

5. Go back to MyWebsite and enter the js folder.

```
C:\MyWebsite\css>cd ..

C:\MyWebsite>cd js
```

6. Create a file named script.js containing the text "// JavaScript code here".

```
C:\MyWebsite>cd js

C:\MyWebsite\js>echo // JavaScript code here > script.js

C:\MyWebsite\js>cd ..
```

7. Return to MyWebsite and create a file named index.html with the text "<h1>Welcome</h1>".

```
C:\MyWebsite\js>cd ..

C:\MyWebsite>echo <h1>Welcome</h1> > index.html
> was unexpected at this time.

C:\MyWebsite>echo "<h1>Welcome</h1>" > index.html

C:\MyWebsite>copy index.html about.html
        1 file(s) copied.
```

8. Copy index.html and rename the copy to about.html.

```
C:\MyWebsite>copy index.html about.html
        1 file(s) copied.
```

9. Create a folder named Backup inside MyWebsite.

```
C:\MyWebsite>mkdir Backup
```

10. Move about.html into the Backup folder.

```
C:\MyWebsite>mkdir Backup
```

11. Navigate back to the C drive root.

```
C:\MyWebsite>cd \

C:\>rmdir /s /q MyWebsite
```

12. Delete the entire MyWebsite folder with all contents, suppressing confirmation prompts.

```

```

TASK4

1. Open Command Prompt and navigate to the C drive root.

```
Microsoft Windows [Version 10.0.22000.2538]
(c) Microsoft Corporation. All rights reserve

C:\Users\Bima>cd \
```

2. Create a folder named ClassRecords and move into it.

```
C:\>mkdir ClassRecords

C:\>cd ClassRecords
```

3. Create an empty file named attendance.txt.

```
C:\ClassRecords>type nul > attendance.txt

C:\ClassRecords>echo Student Grades - Semester 1 > grades.txt
```

4. a file named grades.txt containing the text "Student Grades - Semester 1".

```
C:\ClassRecords>echo Student Grades - Semester 1 > grades.txt

C:\ClassRecords>mkdir Completed Pending
```

5. Create a subfolder named Completed and another named Pending.

```
C:\ClassRecords>mkdir Completed Pending
```

6. Copy grades.txt into both Completed and Pending folders.

```
C:\ClassRecords>copy grades.txt Completed
        1 file(s) copied.
```

7. The file inside Completed to grades_final.txt.

```
C:\ClassRecords>ren Completed\grades.txt grades_final.txt
```

8. Delete attendance.txt from the main ClassRecords folder.

```
C:\ClassRecords>del attendance.txt
```

9. Create a folder named OldRecords inside ClassRecords.

```
C:\ClassRecords>mkdir OldRecords
```

10. Delete the OldRecords folder (it should be empty).

```
C:\ClassRecords>rmdir OldRecords
```

11. Navigate back to the C drive root.

```
C:\ClassRecords>cd \

C:\>rmdir /s Pending
```

12. Delete the Pending folder and its contents with confirmation.

```
C:\ClassRecords>rmdir /s /q ClassRecords
The system cannot find the file specified.
```

13. Delete the entire ClassRecords folder silently without confirmation.

Success Criteria: No trace of ClassRecords remains on the C drive.

```
C:\ClassRecords>cd \

C:\>rmdir /s /q ClassRecords
